INTRUSION PREVENTION SERVICES

powering Clone Guard® Network Security

Intrusion Prevention Services

Monitor your network in real-time to detect and prevent threats with Clone Systems' Intrusion Prevention Services (IPS)

Protects your business in real-time against global emerging threats and vulnerabilities

✓ **Threat intelligence and signature updates** consistently updated from multiple security sources that details how to detect and protect against emerging threats and vulnerabilities

✓ **24/7 Monitoring and alerting** that leverages threat intelligence to block threats and vulnerabilities automatically

Security Operation Center monitoring your security environment, tuning the IPS to distinguish critical threats from false positives, and escalating as needed 24/7/365

Provides additional security resources via managed solutions that free your team to focus on driving core business value

✓ **Vendor agnostic expertise** enabling our solutions and skilled security engineers to work with any existing security infrastructure on your network

✓ **Clone Guard® Network Security** delivered as a fixed cost service without requiring any capital expenditures from your budget

✓ **Software updates and patches** maintained by our security engineers to address security infrastructure bugs and vulnerabilities

Addresses your business and compliance needs with executive level and detailed reports and dashboards enabling you to visually investigate the threats and vulnerabilities targeting your business

✓ **Actionable reporting** tailored to your business needs, compliance standards, and investigative requirements

✓ **Customizable dashboards** providing a visual representation of threats and vulnerabilities allowing you to filter detailed security event information

*Option for Intrusion Detection Services (IDS) which allow you to monitor and detect threats
