MANAGED PENETRATION TESTING

powering Clone Guard® Security Scanning

Managed Penetration Testing

Perform real world attack simulations on your infrastructure to identify existing vulnerabilities and obtain recommendations on how to improve your overall security with Clone Systems' Managed Penetration Testing

Obtain support, education, and guidance from certified security engineers on how to improve your network

- ✓ **Managed by our certified security engineers** who have extensive experience with assessing vulnerabilities for both security and compliance
- ✓ **Detailed vulnerability report** including high, medium, and low vulnerabilities found and exploited with remediation guidance and recommendations

Improve your overall security posture and your policies and procedures by understanding the vulnerabilities within your network and how to remediate them

- ✓ **Identify and exploit vulnerabilities** by simulating real-world attacks to assess the security posture of your network
- ✓ **Robust solution using the latest technology** comprised of a combination of best of breed open source, and proprietary tools
- ✓ **4 days of comprehensive testing** with a combination of white hat and black hat techniques with and without passwords to assess your network
- ✓ **Perform internal and external penetration testing** customized to meet your business requirements
- ✓ **Social engineering options available** that imitate techniques used by hackers to target your employees to obtain your company's private information
- ✓ **Ample time included for remediation followed by a rescan** of your environment to assess the status of vulnerabilities

Meet and exceed audit, regulatory and compliance requirements validated by Clone Systems security expertise

- ✓ **Certified pass report** after assessing that there are no high or medium vulnerabilities in your environment
- ✓ **Includes 1 year access to our OnDemand web-based scanning portal** to allow your team to perform ongoing assessments of your security posture

*OnDemand Penetration testing available if you want your team to conduct the scan
