

VULNERABILITY ASSESSMENT

powering Clone Guard® Security Scanning

Vulnerability
Assessment

Assess the security and integrity of your infrastructure to identify vulnerabilities and obtain recommendations on how to improve your overall security posture with Clone Systems' **Vulnerability Assessment**

Proactively assess your network to identify and prioritize your network security threats

- ✓ **Easy to use self-managed web-based scanning portal** which enables you to schedule and run scans as needed
- ✓ **Perform internal and/or external vulnerability testing** to obtain a deeper understanding of your overall security posture

Minimize the risk of a security breach by providing insights and guidance to properly secure your network

- ✓ **Detailed remediation steps** for protecting against identified vulnerabilities detected during your vulnerability assessment
- ✓ **Unlimited re-scans** on your network to assess steps taken to fix vulnerabilities
- ✓ **Threat intelligence and signature updates** consistently updated from multiple security sources to protect against emerging threats and vulnerabilities

Obtain executive level and detailed technical reporting for the vulnerabilities that exist in your infrastructure

- ✓ **Pass report** after assessing there are no existing high or medium level vulnerabilities in your environment
