

# GENERAL DATA PROTECTION REGULATION

powering Clone Guard® Security Consulting

**GDPR focuses on strengthening and unifying data protection regulations within the European Union (EU) and Clone Systems can assist your organization with the auditing expertise and security solutions that will prepare your organization to comply**

## If your organization stores information on a citizen of the EU than you will need to comply with GDPR

- ✓ **Enforceable on May 25th, 2018** and is a massive regulation with 99 articles
- ✓ **Focuses on giving EU citizens more control over their personal data**
- ✓ **Establishes rules for how personal data is protected, managed, processed and deleted**
- ✓ **Incorporates hefty fines for organizations that do not comply** up to 20 million euros or 4% of your company's annual global revenue

## Assess the impact that GDPR will have on your organization in order to identify and remediate compliance and security gaps so your organization can conform to the regulation

- ✓ **Educate your organization about GDPR** and what is required to comply with this regulation
- ✓ **Engage with our experienced team of Data Protection Officers (DPOs) to audit the personal data within your organization** and to assess and improve your processes and procedures for handling and protecting this personal data
- ✓ **Conduct GDPR optimized vulnerability scans and penetration tests against your security infrastructure** to assess your security posture and to identify any vulnerabilities and gaps that need to be remediated
- ✓ **Gain access to an intuitive suite of best of breed Managed Security Services** that compliments and strengthens your existing security infrastructure investment while reducing your business risk
- ✓ **Demonstrate compliance with GDPR** by aligning your organizations policies, procedures, standards and audit results to the regulation
